

CONFIGURING SPECIES

To configure species you will have to open the “Species” screen first. You can do this by going to **Settings > Species**. (See *Image 1*.)

When you’re in the species screen, you can configure several options for all species you’ll catch. We’ll explain this using an example.

Step 1 – Adding a specie

Before you can configure a specie it has to be added to the table at the left of the screen first. (If it is already, you can skip to step 2.)

You can add a new specie to the table using the menu at the bottom of the screen (*Image 2*).

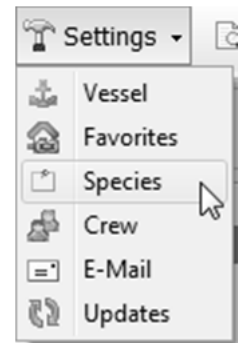

Image 1

First you’ll have to select the specie you want to configure. In our example we’ll choose herring (code **HER**). You can pick a specie from the dropdown-list or search for it with help of the search menu. Image 2

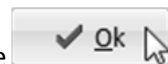

To open the search menu, click at the magnifier icon at the right top of the Specie dropdown-menu (*Image 4*).

Type any part of the name/code of the specie to search for it. (*Image 3*)

Image 4

Image 3

Then select the right specie and click the

Now select the **quality** of the fish using the dropdown-menu. Do the same for the **presentation** and the **condition**.

The last thing you’ll have to choose is the amount of fish that fits in a box. Enter it at the **Qty. Box** field at the right of the

form. Then click the

button.

Step 2 – Adjusting a specie’s configuration

The specie (**Herring**, in our example) has now been added to the screen, with the options we just configured (*Image 5*). The specie will now appear in the **Tow Information** screen.

If you select it, you can adjust additional options like **Price** and **Percentage**.

The option **Price** gives you an indication of your earnings during a trip. Using **Percentage** you can choose a minimum or a maximum percentage of the total amount of caught fish the specie should constitute. For the meaning of the other fields, please refer to *Step 1*.

Code	Name	Presentation	Price	Quality	Condition	Qty. Box	%
HER	Herring	Gutted	0	A	Fresh	40	0

If you make any changes to the settings for a specie, don’t forget to save it using the **Save** button. (**Cancel** discards the changes.)

Code: HER

Name: Herring

Price: 0.00

Percentage: ☐ 0.00

Presentation: Gutted

Condition: Fresh

Qty. Box: 40

Image 5

Step 3 – Removal

You can remove a specie from the list selecting it and clicking the

button.
