

When you're fishing at Norway please first make sure you have clicked on the Norway button.

When you're at the fishing trip go to the Zone Change tab by clicking on "Zone Change".

The zone change screen will open.

 A screenshot of the 'Zone Change' screen. It features a sidebar on the left with a 'Date' field and a '+ New' button at the bottom. The main area contains several input fields and dropdown menus. Numbered annotations are present:

- 1**: Points to the date and time fields at the top right.
- 2**: Points to the 'Statistical Rectangle' field.
- 3**: Points to the 'Economic Zone' and 'Division' dropdowns.
- 4**: Points to the 'Transzonal Fishing' checkbox and 'Directed Specie' dropdown.
- 5**: Points to the 'Export' and 'Cancel' buttons at the bottom.
- 6**: Points to the '+ New' button in the sidebar.

1. First you must fill in the date, time, latitude and longitude.
2. In field 2 you must fill in the statistical rectangle from the zone you want to enter and the zone you're leaving. After that you must choose a target specie.
3. In field 3 you need to choose the economical zone of the zone you're entering and the one you're leaving. For the zone you want to enter this one is of course Norway. After the economical zone you must choose a division that you're entering and leaving. The last one in field 3 is the effort zone. Here you must choose the effort zone you are entering and leaving. Of course the one you're entering must be set on K:Norway.
4. In field 4 you can choose if you are a member of transzonal fishing and you can choose a directed specie for the zone you're entering.
5. If you filled in all the fields correctly you must click on Export. E-Catch will automatically lead you to the communication screen where you must send the Zone change message by clicking on "Send Receive".
6. If you need to do another zone change later in this fishing trip you must click on +New. To reset the zone change screen and you can fill in another zone change.
